MEMORANDUM FOR THE RECORD

SUBJECT: OCS Problems

In the course of the DD/S tour of the OCS Computer Center and the SIPS Task Group space on the ground floor of Headquarters Building, the following points were made by Mr. Briggs:

1. The lack of a capability to backstop a "disaster" at Headquarters is recognized. Consideration is being given to the [ ] of a small IBM 360 series system which would serve to backup OCS, CRS, and RID against emergencies involving their Headquarters equipment and, at the same time, provide a system usable by OC elements [ ]

25X1A

25X1A

2. Renovation delays and worries with the contractor have been extremely frustrating. OCS believes most positively that this contractor should not again be awarded any Agency work.

3. The need for additional space in the amount of 1800 square feet is now foreseen by OCS in this Building.
